Introduction Section Peer Review

- Topic sentence clearly states the purpose of the lab.
- Intro paragraph uses research from 1-2 credible sources.
- The sources are clearly related to the topic that the student is testing.
- The sources are cited with parenthesis in APA format, like this: (Chase, 2016).
- The intro paragraph mentions real-world importance of the lab. (why someone should care about the results)
- The intro paragraph ends with an "If _____, then _____" style hypothesis.
- The hypothesis follows the 4 hypothesis rules (if____, then____; testable (clear independent and dependent variables) ; objective language; research-based) If not, circle which ones it is missing!

Warm Feedback:

Methods Section Peer Review

Reviewer 1's name:

- I could read this section and repeat the exact procedure that this group did.
- It says how many trials the group performed.
- I can tell what the group was measuring at the end of the experiment (dependent variable).
- I can tell how the group measured their data (there were units on the dependent variable).
- I can tell that the person controlled multiple variables.
- All glassware and materials are labelled with units and sizes. (ex: 25 mL beaker)
